

SOP: BigFix Client installation

Purpose: To ensure the consistent and accurate installation of the HCL BigFix client on user machines, enabling them to report and receive updates from the BigFix infrastructure.

Software Path: \\starinshfs03\Standard_Software\New updated software\MARCH 2024\Bigfix Client

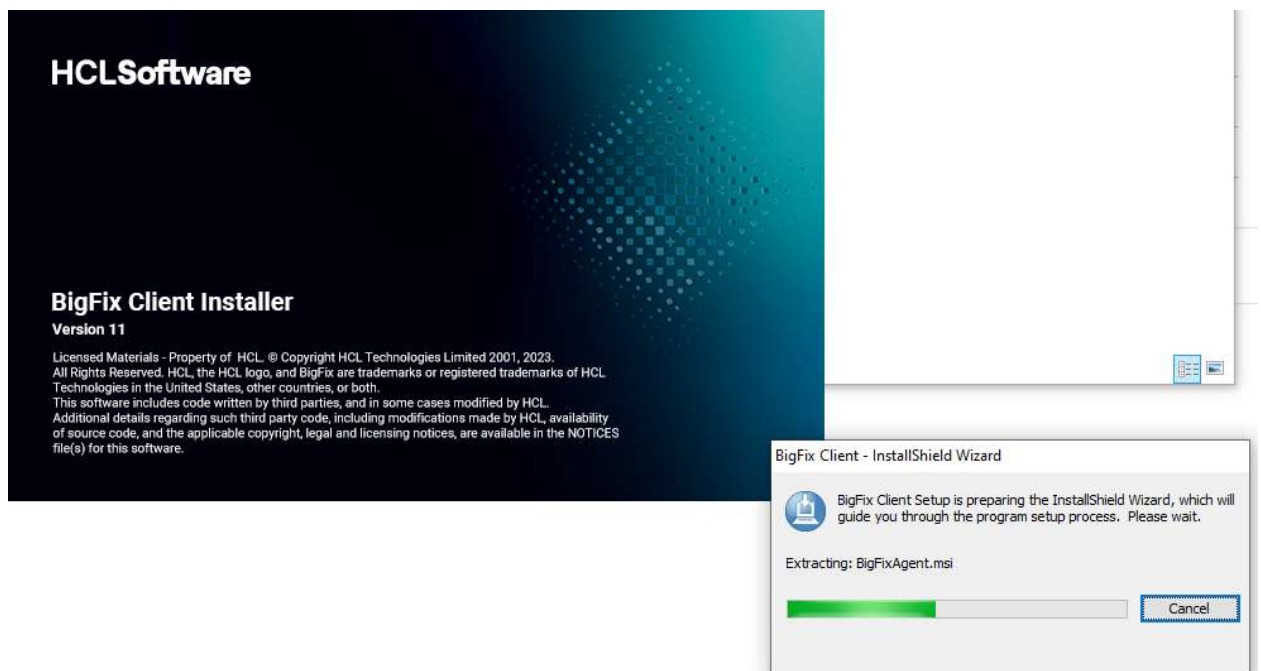

Steps for Installation on Windows:

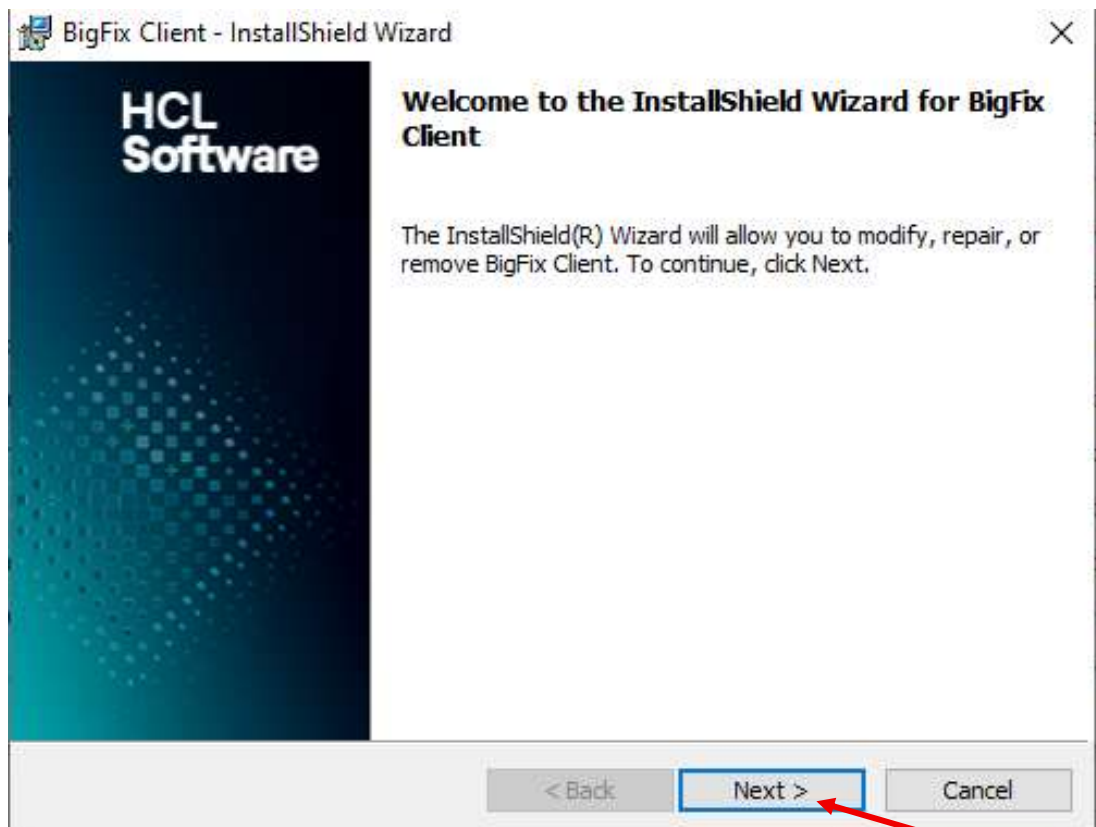

1. Copy the BigFix client Setup on User C Drive:

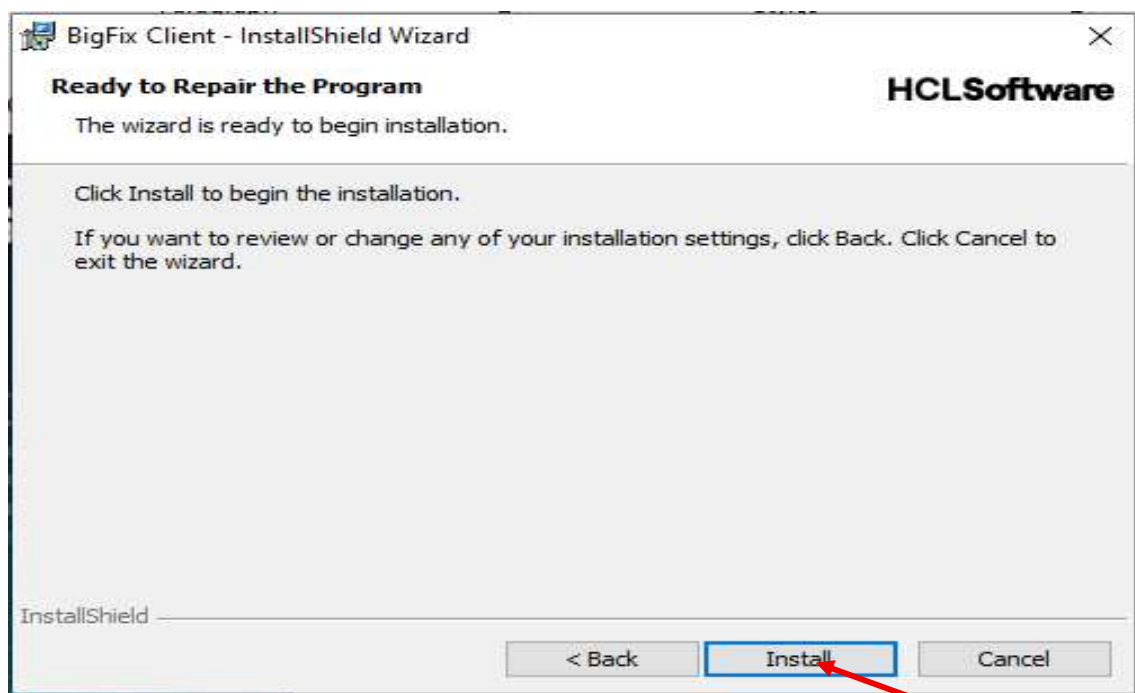

2. Run the Installer:

- o Locate the installer (e.g., BESClientSetup.exe), and double-click to start the installation.

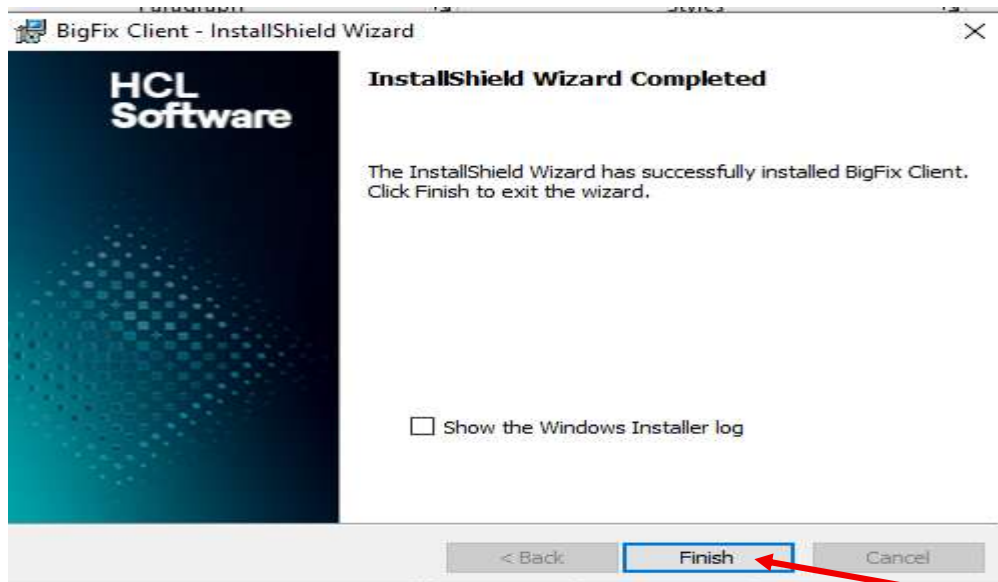

Click to Next

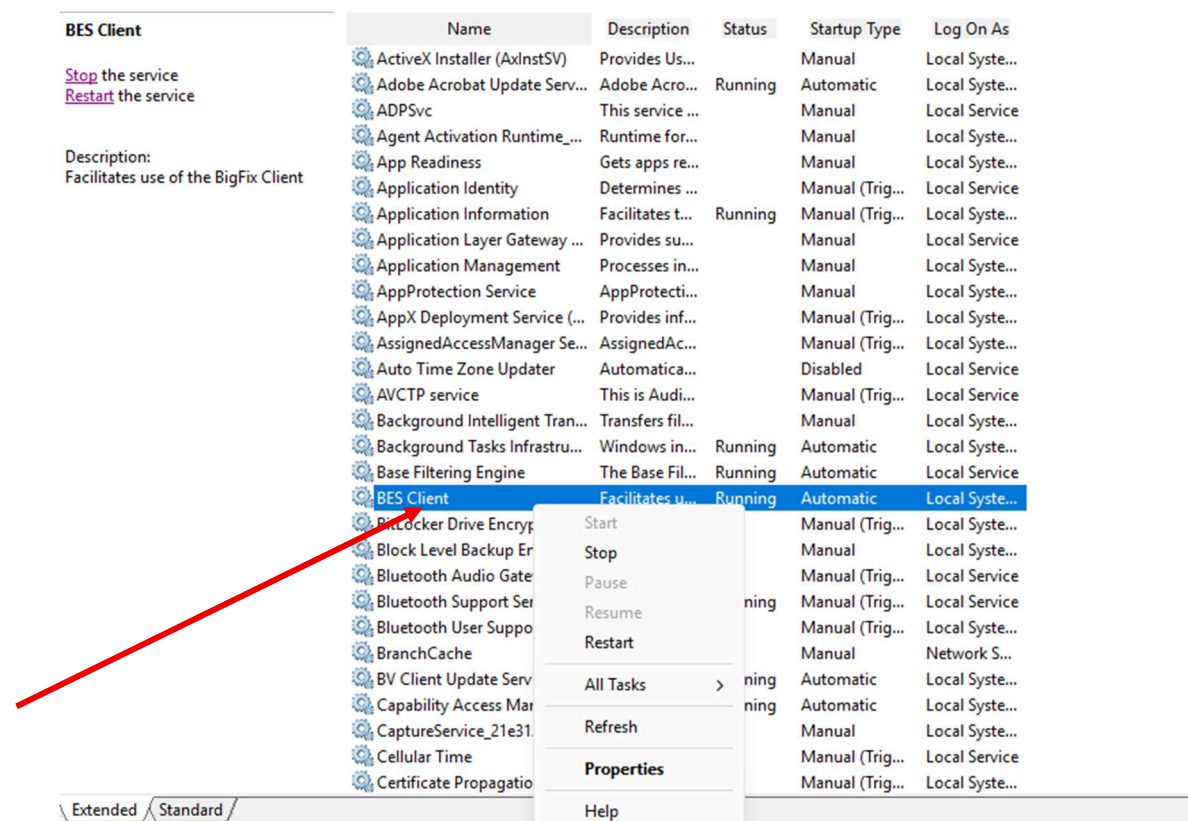

3. Complete Installation:

- Once the installation configuration is set, proceed with the installation.
- Click Finish when the process is complete.

4. Post-Installation: Start the BES Client Service:

- Open Services Panel - Press Win + R, type (services.msc), and press Enter.
- Locate BES Client Service - In the list of services, find BES Client.
- Start the Service - If the status is Stopped, right-click on BES Client → Select Start.

5. Verification:

- You can verify the client status in the BigFix Console by checking the machine's report.
