

SOP: YUMI installation SOP

Purpose:

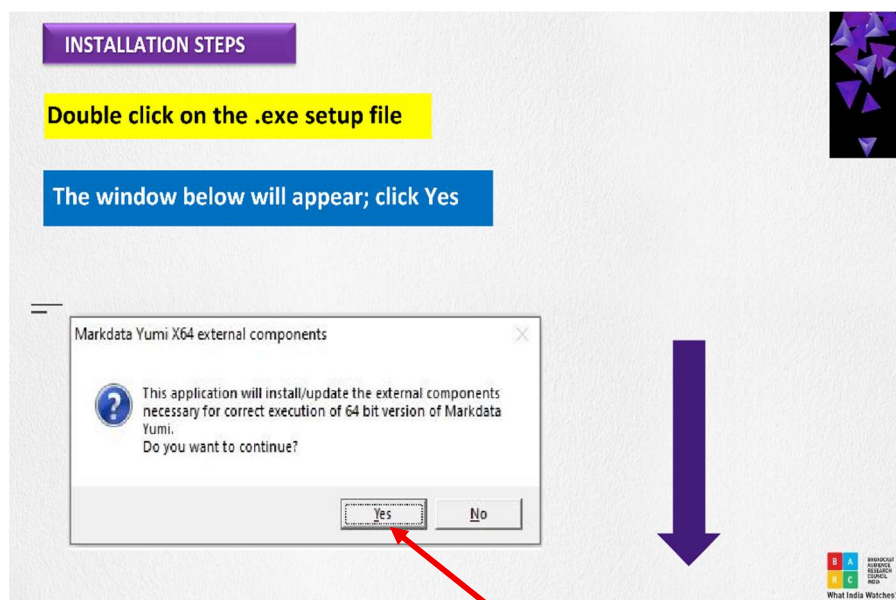

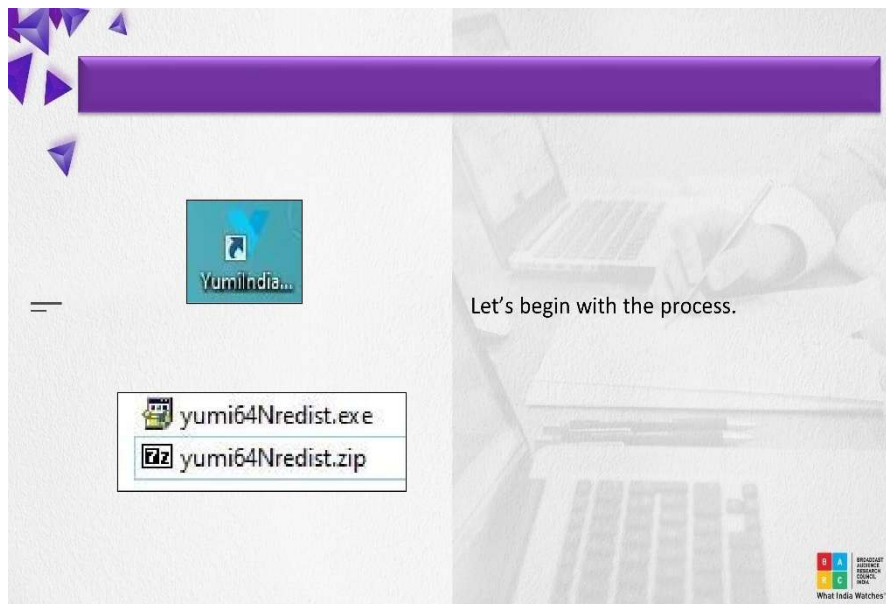

The purpose of this SOP is to guide users through the secure and correct installation or upgrade of the YUMI application, including its required components and licensing, ensuring proper setup and functionality.

Software Path: \\starinshfs03\Standard_Software\Other Software\BARC
&Yumi\YumiIndiaX64_23.2.1.2_full_x64

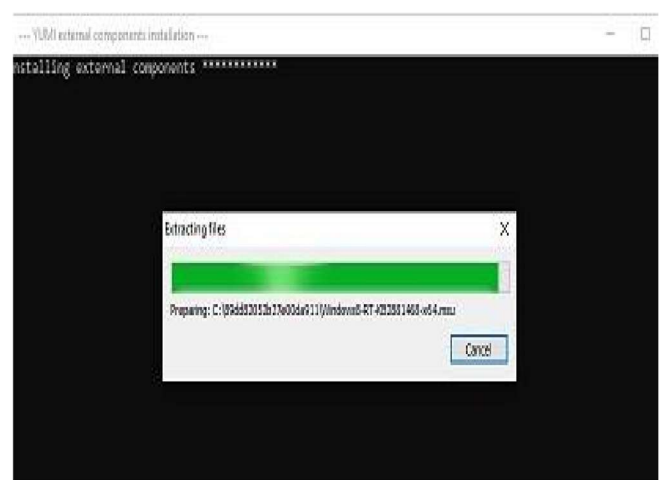

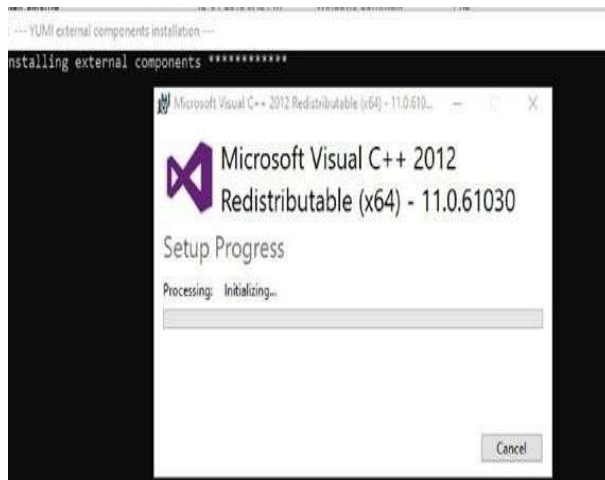

Steps to install YUMI application in system:

Step 1: Install YUMI Client Component

- Install the YUMI client component first. This is mandatory before installing YUMI.
- Click Yes on any prompts that appear.

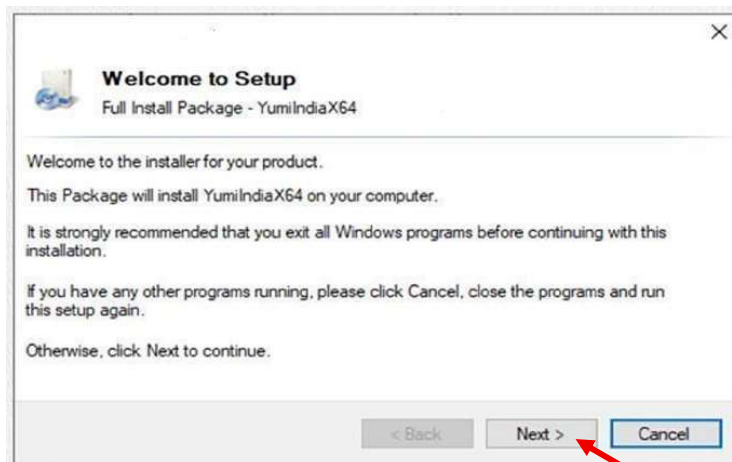

- The component will install automatically on the default Windows drive.

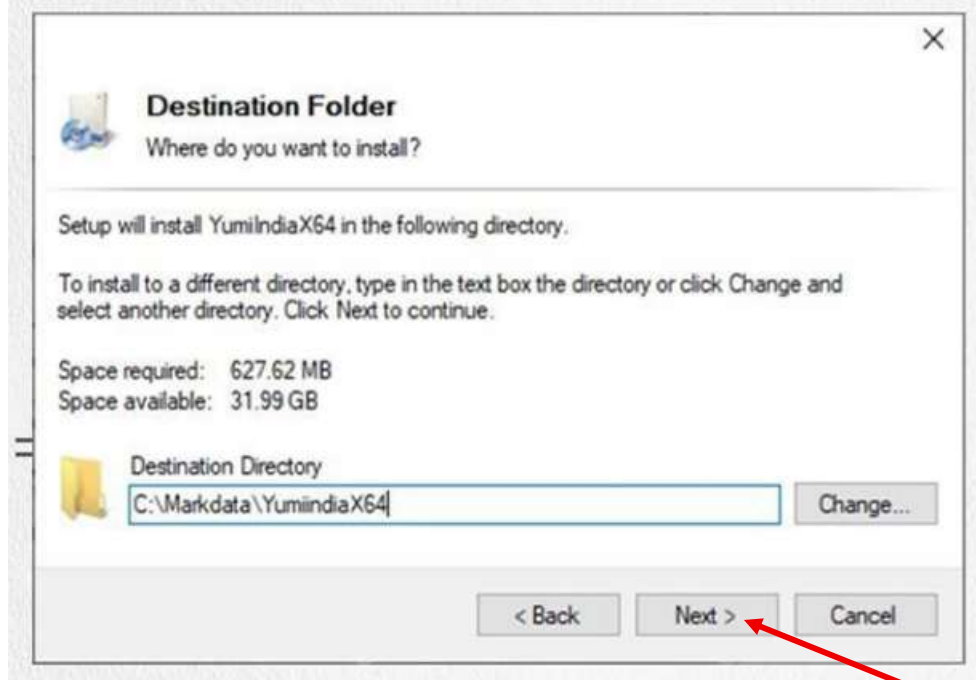

Step 2: Proceed with YUMI Installation/Upgrade

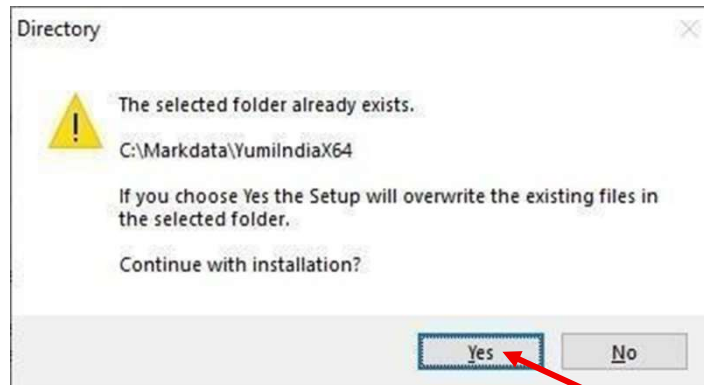

- Double-click on the YUMI setup file.
Path: \\starinshfs03\Standard_Software\Other Software\BARC & Yumi\YumiIndiaX64_23.2.1.2_full_x64
- Click Next on the installation window.

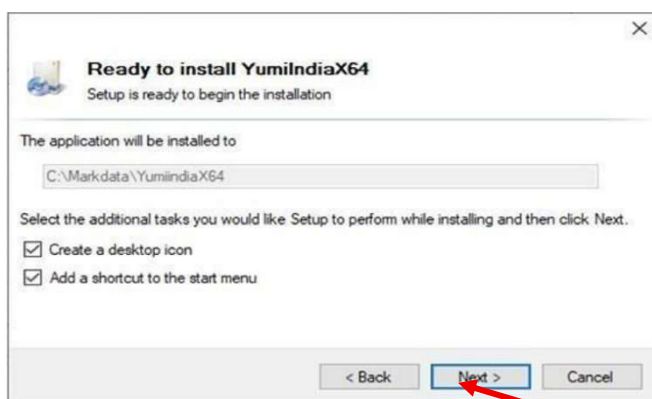

- Check the destination directory for installation. It should match the existing YUMI installation:
C:\Markdata\YumindiaX64

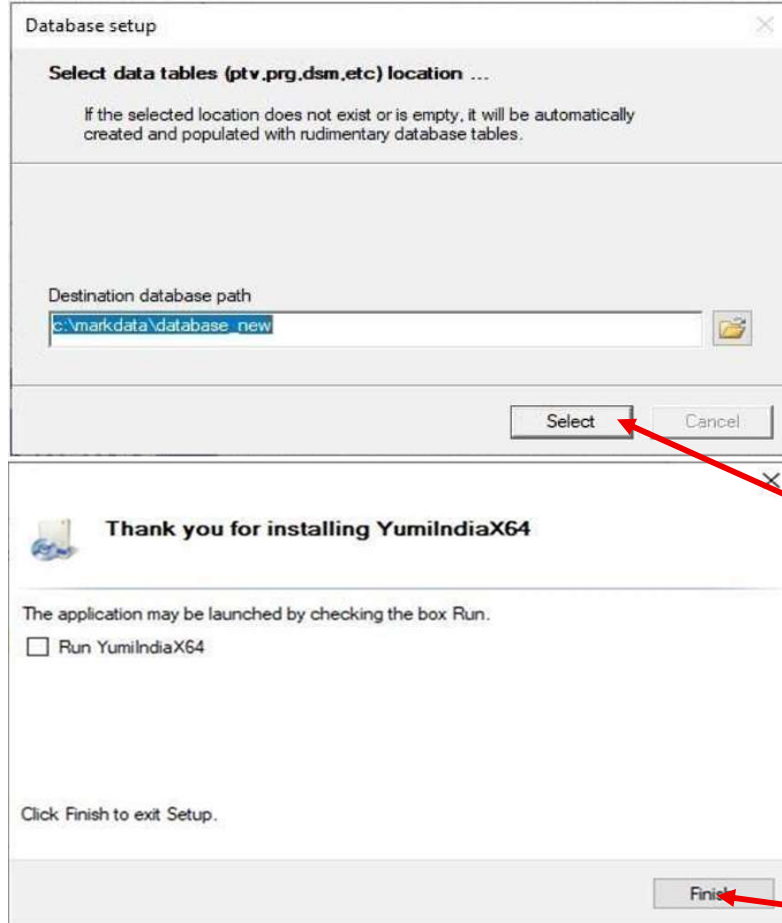

- The setup will detect the last existing installation path automatically. However, kindly reconfirm the correct path before proceeding further with the installation. Click yes on below path if the path is correctly provided.

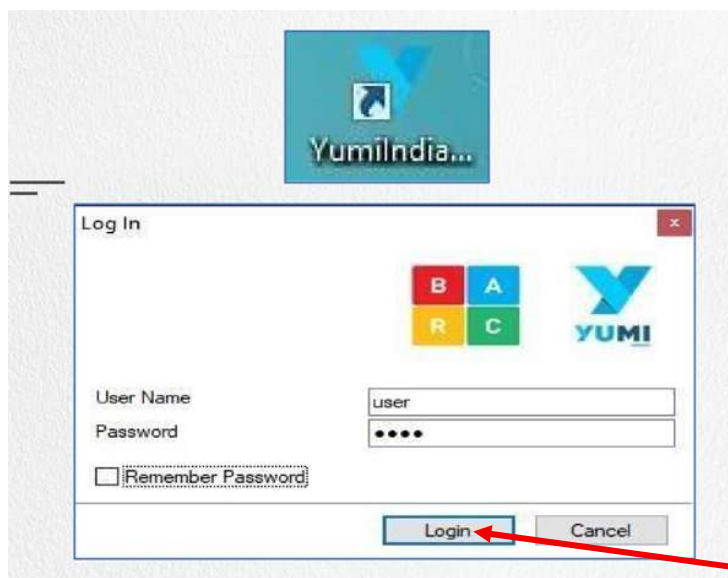

- Remove the checkmark from the window below.

- Click on select every time the screen below appears. (Kindly do not change the default path). Also click select/ok if prompted.

- Click on Yumi icon and open the application. User below credentials to login to application.
 - a. Username: user
 - b. Password: user

- After clicking on login, it will ask to install license. Click on install and open the path where YUMI setup is present. On the same path you will find .uli file named **“Star India Pvt Ltd_YUMIP1.1.uli”**.
- Once license installed you can use YUMI applications.
