

# SOP: Wi-Fi Connection

## **Purpose:**

The purpose of this SOP is to ensure that Star Team PCs can connect to the corporate Wi-Fi network by disabling Virtualization-Based Security (VBS) which may interfere with network connectivity. Following these steps guarantees proper configuration, successful policy updates, and secure access to the Wi-Fi network.

## Star Team PC

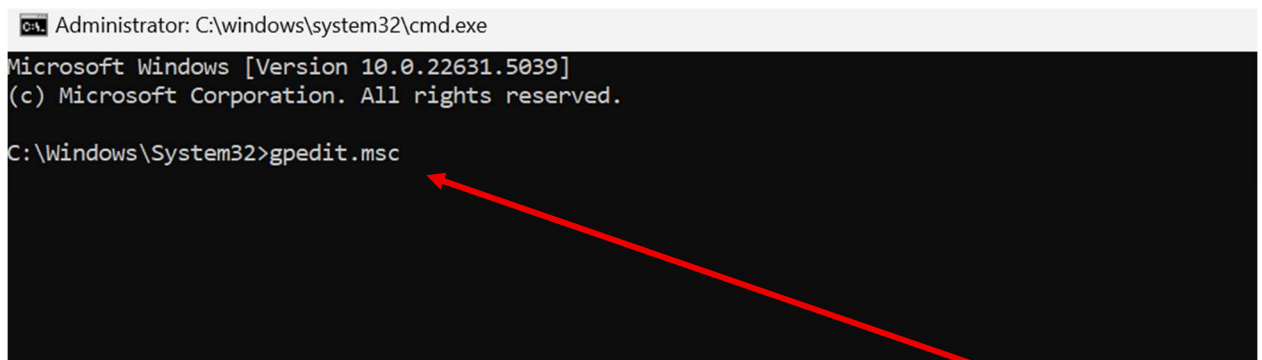

Steps to connect Star Team PC via Disabling credentials manager:

### **Step 1:** Open Command Prompt as Administrator

- Click on the Start Menu.
- Type cmd in the search bar.
- Right-click on Command Prompt and select Run as administrator.

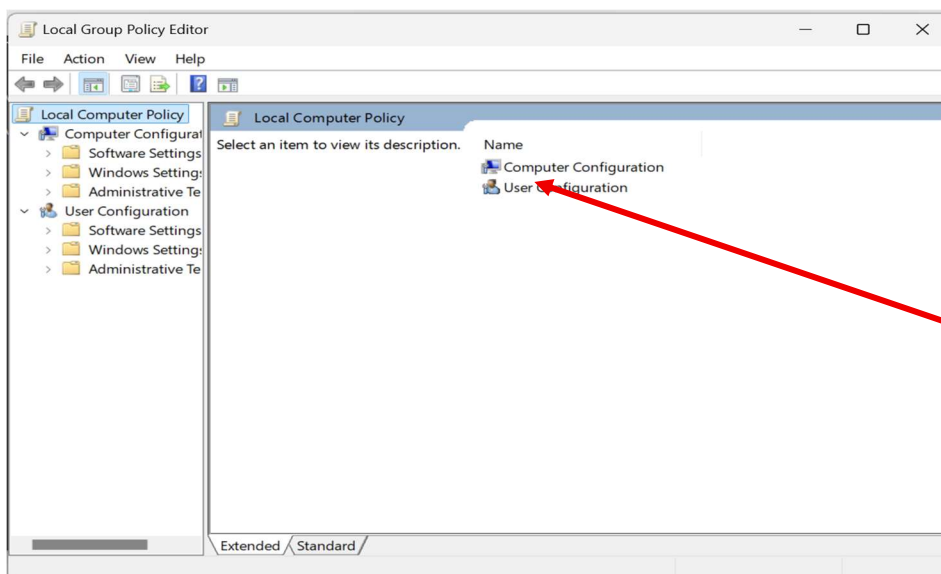

### **Step 2:** Run the Group Policy Editor

- In the Command Prompt window, type:

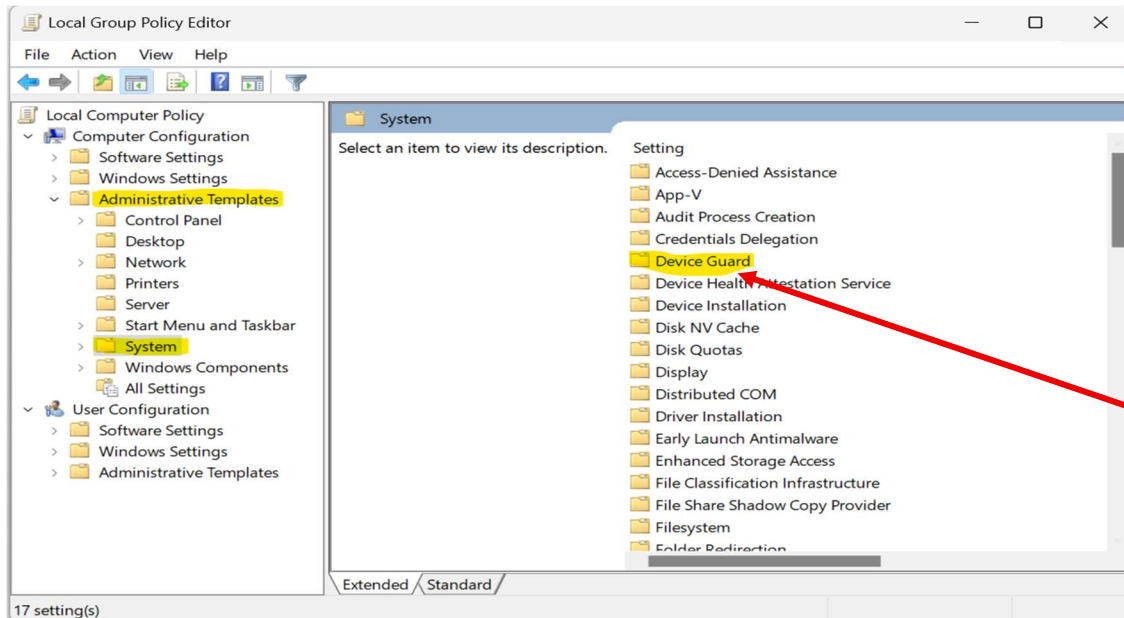

```
C:\Windows\System32>gpedit.msc
```

- Press Enter.
- The Local Group Policy Editor should open.

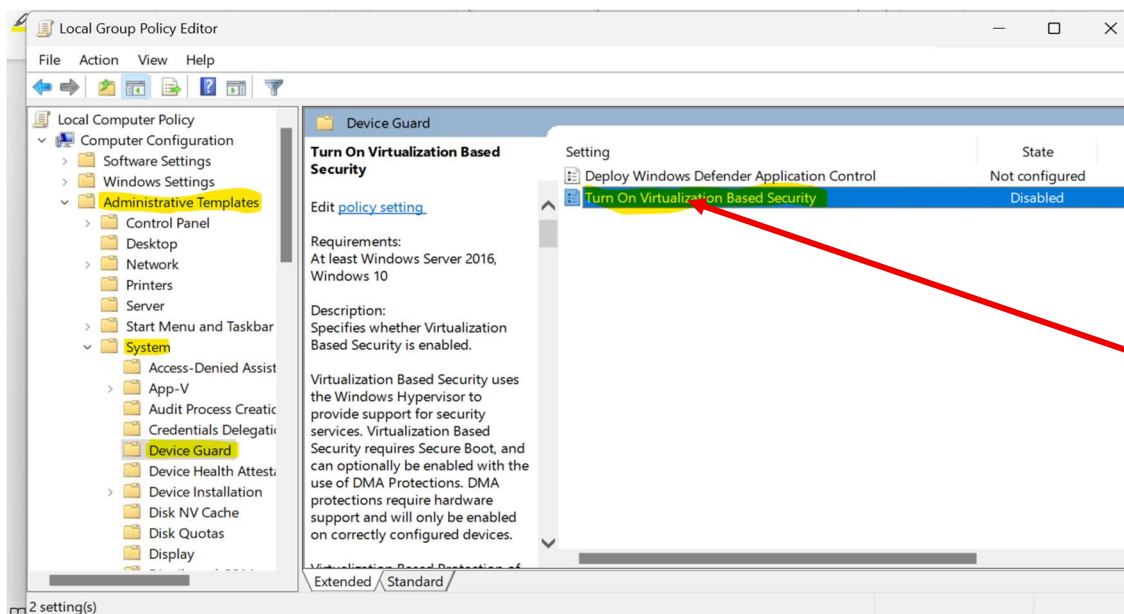

### Step 3: Click on Administrative Templates in Computer Configuration

- In the Local Group Policy Editor, navigate to the left panel.
- Under Computer Configuration, click on Administrative Templates to expand its options.
- Click on System from the list.
- After System, click on Device Guard.

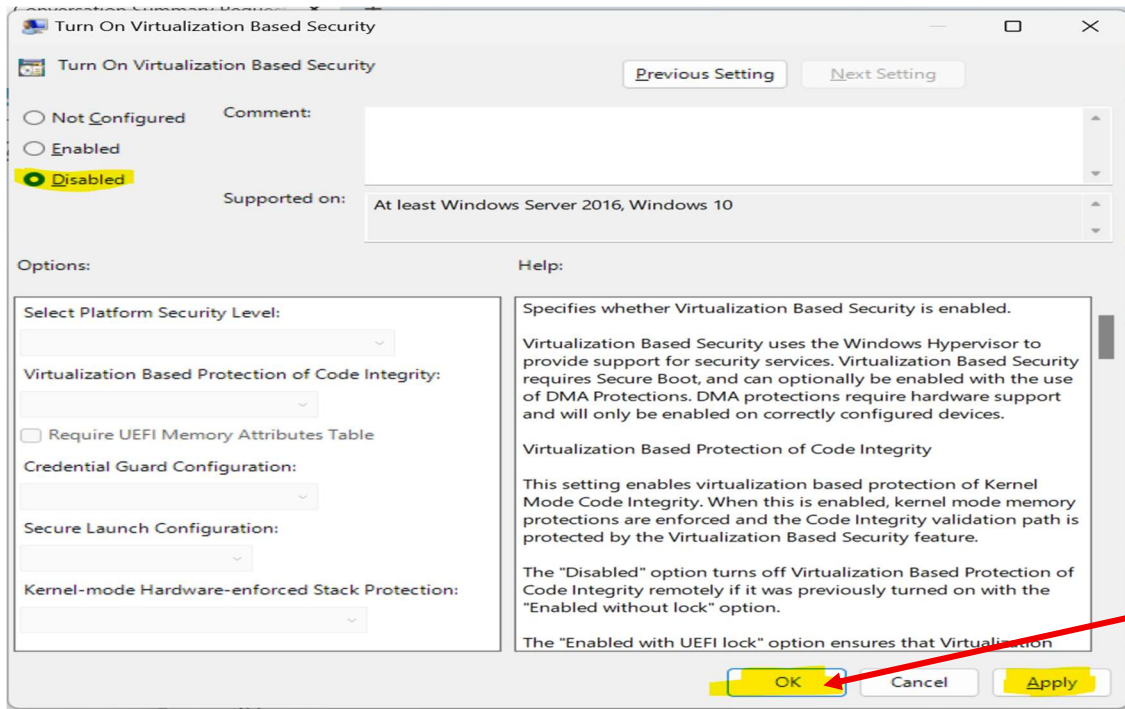

- In Device Guard, click on Turn on Virtualization Based Security.

### Step 4: Disable Virtualization-Based Security

- In the Device Guard section, locate Turn on Virtualization Based Security on the right panel.
- Double-click on Turn on Virtualization Based Security to open its settings.
- In the new window, select the Disabled option.

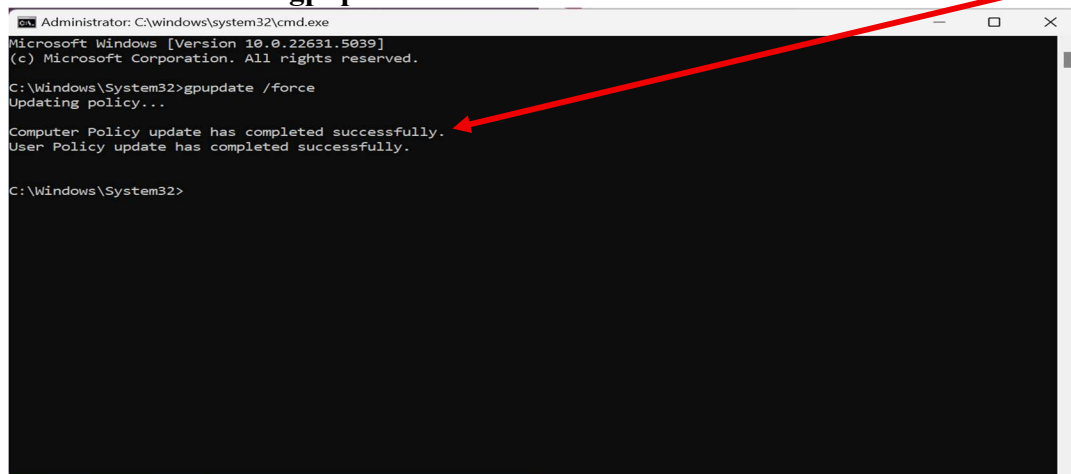

- Click Apply, then click OK to save the changes.

#### Step 5: Update Group Policy and Restart the System

- Open Command Prompt as an administrator.
- Type the following command and press Enter:

**gpupdate /force**

- Wait for both Computer Policy update, and User Policy update to complete successfully.
- Once the update is successful, restart your system.
- After restarting, connect the Star Team PC to Wi-Fi. It should be connected successfully.

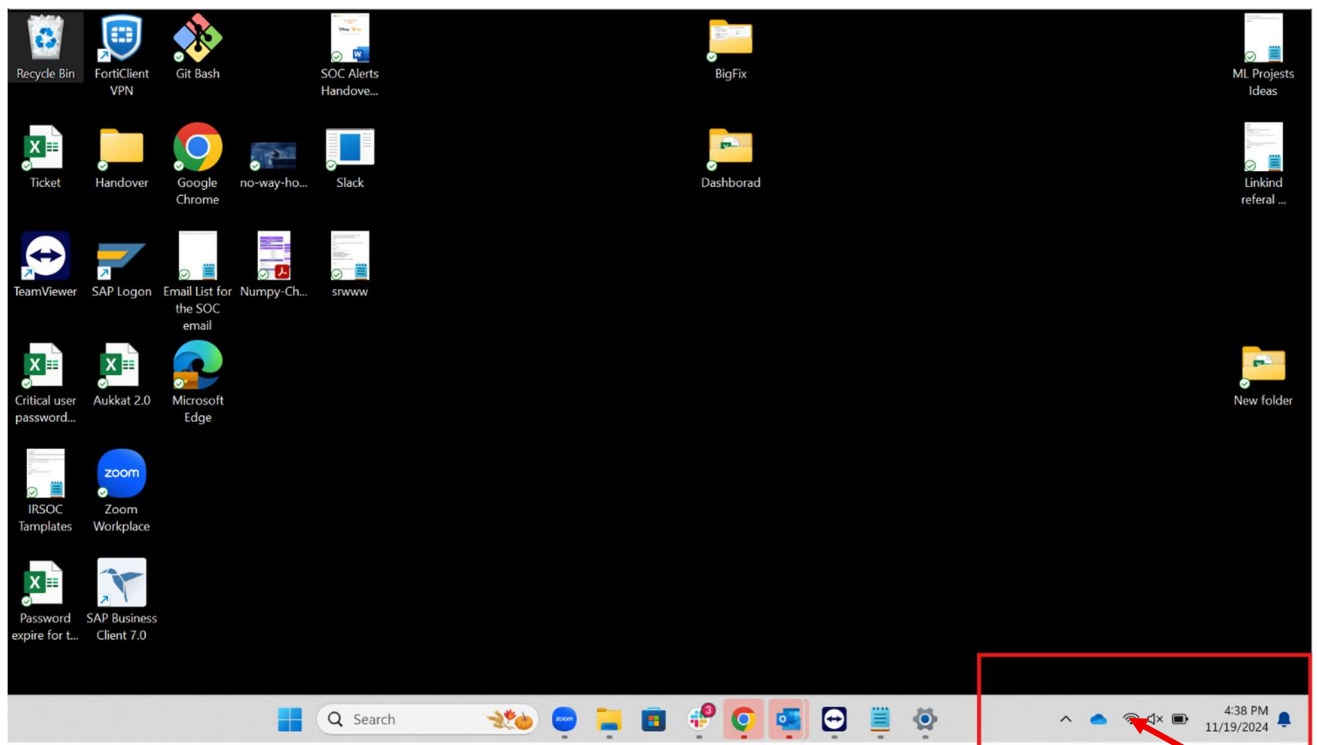

## How to connect the Jistar OUC in Windows System :

### Purpose:

The purpose of connecting to the JioStar\_OUC Wi-Fi on Windows systems is to provide secure wireless access to the corporate network using certificate-based authentication for domain-joined machines. This ensures only authorized systems can access organizational resources.

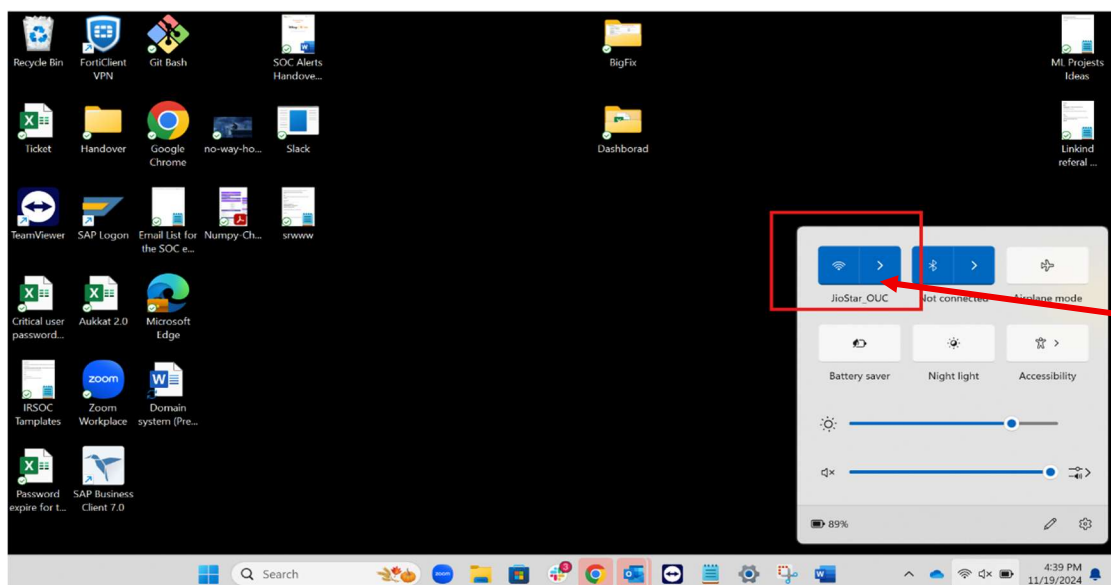

#### 1- Open Wi-Fi Menu

- On the taskbar (bottom-right corner), click the **Wi-Fi icon**.

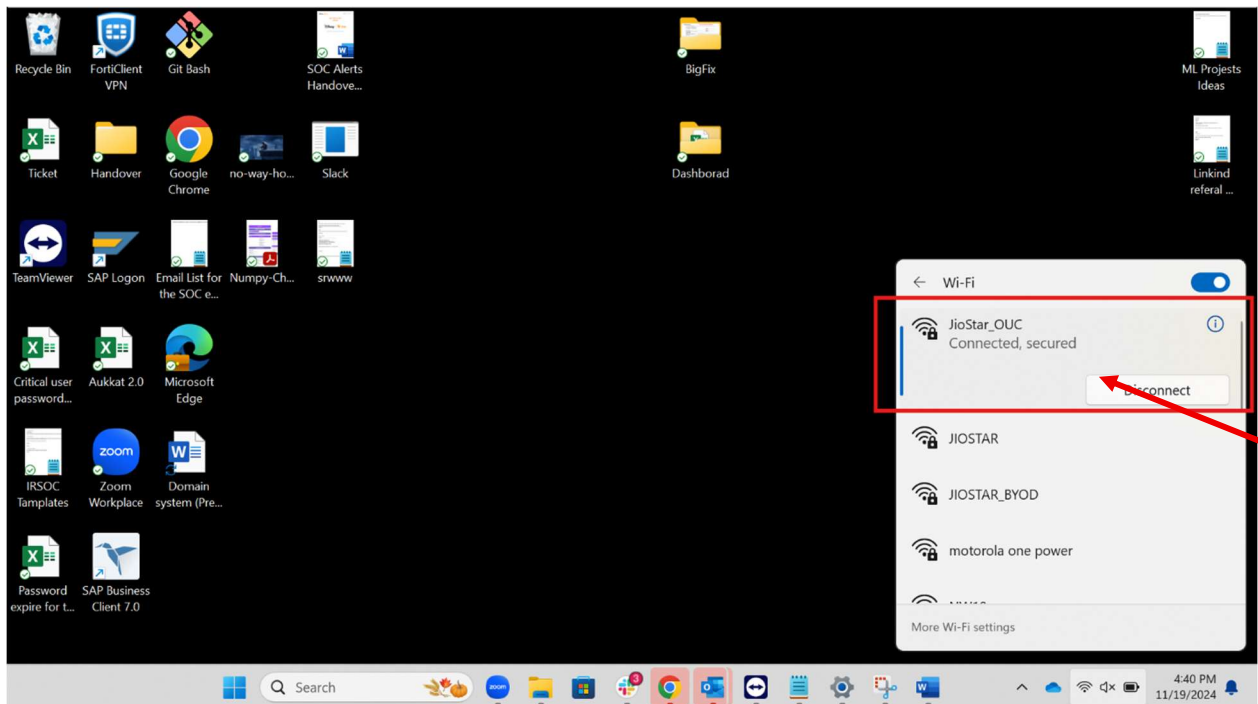

#### 2- Select Network

- From the list of available networks, click on **JioStar\_OUC**.

### 3- Automatic Connection (Domain-Joined Systems)

- If the Windows system is **domain-joined** and supports **certificate-based authentication**, the connection (**JioStar\_OUC Wi-Fi**) will be established automatically without requiring manual credentials.

**Note :** If the Windows system is not domain-joined, the connection to JioStar\_OUC Wi-Fi will not be successful.
